

14 December 2020

Dear Parents & Carers,

I'm writing to advise that two students in Year 10 have tested positive for Coronavirus. The two cases do not appear to be related, as the students do not have any classes together and do not mix socially.

During the day, we have isolated any student who was in close contact with the positive cases during the potentially infectious period last week. **If you have not been contacted by us then that means your child has not been in contact with either case, so you do not need to take any action.**

More generally, please continue to support us during this period by not sending your child to school if they or anyone in the household has symptoms. Also please do encourage them to always socially distance, wear masks, hand-wash, walk or cycle to school by themselves, and follow all other control measures.

Many thanks,

**David Benson**  
Principal
