

Maths GCSE revision – February half term

Well done for all your hard work so far.

You will want to make the most of this opportunity to revise for your upcoming mocks (3 papers – 1 non calculator and 2 calculator)

1. Complete past paper

- Complete the past paper which your teacher has given you. Use the mark schemes on google classroom to check your work.
- Use the paper to identify where you need to do further revision

2. Sparx

- Your teacher will continue to set Sparx throughout the holidays.
- These topics will be ones that have been identified as targets from your last mocks and things you have been working on in class.
- Complete all questions, watching the videos where required, until you get **100%**. Top up with **XP boost**.
- Use the **independent learning tab** to revise topics you have identified as target areas.

3. Use Maths Genie

- Select your target grade and the two grades below (eg. if you are aiming for a grade 5, work on questions in sections grade 3 – grade 5).
- Watch the videos, practise the questions, check your answers.
- Self select topics you know you need to work on.
