

# Maths GCSE revision – Easter Holidays

Well done for all your hard work so far.

The Easter holidays are a great opportunity to work on the topics you have identified as target areas from your March mocks.

Here are the things you should be doing.....

## 1. Complete past papers

- Finish past paper booklet 2 – mark schemes are on google classroom.
- Use Maths Genie to find further papers.
- For even more papers, click on the resources tab on Maths Genie and then predicted papers.

## 2. Use Maths Genie

- Select your target grade and the two grades below (eg. if you are aiming for a grade 5, work on questions in sections grade 3 – grade 5).
- Watch the videos, practise the questions, check your answers.
- Self-select topics you know you need to work on.

## 3. Sparx

- Your teacher will continue to set Sparx throughout the holidays.
- These topics will be ones that have been identified as areas for development from your mocks.
- Complete all questions, watching the videos where required, until you get **100%**. Top up with **XP boost**.
- Use the **independent learning tab** to revise topics you have identified as target areas.
